Honolulu Athletic Club Outlines Football Plans—May Move to Waverley Building.

The Honolulu Athletic Club held a meeting at their headquarters on Tuesday evening, for the purpose of discussing football plans.

It was announced that the new quarters would in all probability be situated in a room adjoining the Murphy Hall in the Waverley building.

John Wise was appointed a committee of one to join with the other athletic clubs in the city in the matter of obtaining an athletic ground in the Kewala tract.

It was decided to commence football practice next Friday evening on the drill shed grounds. For the first two or three weeks the work done will be limited to the explaining of the game by old hands to candidates for places on the team, and novices at the game. When the new material has been thoroughly grounded bucking will be commenced.

The regular practice days will be announced at Friday's practice.

Each player will be especially coached for his position by experts at the different plays. Thus a candidate for guard, center or end will be coached by a player who has played and understands thoroughly the duties of the various positions.

The team will be picked solely on the basis of merit, and if a player makes the team it will be by hard work and ability alone.

Nothing in the matter of track athletics was done.

THE FLORIDA RAZORBACK.

The Florida "razorback" is the hog indigenous to this climate and soil. He is usually large of limb and fleet of foot, being the only known porker that can out-run a dandy. He has a tail of wondrous length, which, while he is in active motion, he twists into the tightest corkscrew, but with which while quietly feeding he raps his leathery sides much in the same manner that the docile cow uses her tail. He is self-supporting. He earns his own living and thrives equally well in the high woods, the flat woods, in the hummocks and in the marshes. He subsists upon anything he can find above the earth or underneath its surface. He has a clear, far-seeing eye, and is very sensitive of hearing. Nature has equipped him with a snout almost as long as the beak of the wild pelican of Borneo, with which he can penetrate the earth many inches in quest of worms, snakes and insects. He is the most intelligent of all hogs, and is likewise the most courageous. He has been known to engage in mortal combat with a coon for the possession of a watermelon, and to rend asunder a barbed wire fence—Forest and Stream.
